PROFESSIONAL SUMMARY

An aspiring frontend developer with a heart inclined towards minimalist, responsive, and usable web design. I am skilled at combining clean UI design with working code to create seamless user experiences. Readily adapts to designs, works well in teams, and gives technical contribution to great projects.

PROJECT

Enomy Finance (WebApp)

- Financial management system with in-house currency conversion and investment planning modules.
- Designed for secure data management, personalized quotes, and user-friendly web deployment.
- Tech: Thymeleaf, MySQL, Tailwind, Spring Boot

Meals on Wheels

- Developed a full-stack application for meal scheduling, partner coordination, and delivery management for a charitable organization.

Contribution: Built and managed the admin backend/frontend. Features included:

- Edit & delete menu items
- Activate/deactivate users
- Export CSV reports (donations, registered users, orders, delivery status)
- Manage pending registration approvals (accept/reject)
- Role-based profile editing (member, caregiver, donor, partner, volunteer)
- Developed dynamic registration & login pages, donation page, and dashboards
- Tech: Thymeleaf, MySQL, Tailwind, Spring Boot

Dobu Martial Arts

- Multi-page responsive website with membership management, class schedules, and social media integration.
- Focused on accessibility and seamless user experience.
- Tech: HTML, CSS, JavaScript

EDUCATION

Bachelor of Degree in Software Engineering	Bachelor of Science in Information Technology
Lithan Academy - Singapore	First City Providential College - Philippines
September 2023 - May 2028	September 2023 - May 2027
